TRAINING AND PROFESSIONAL
DEVELOPMENT WORKSHOPS
CALENDAR

Young People shouldn't be uneducated
and Jobless. Get the right skills to
prepare you for the future of work.

OPEN TRAINING PROGRAMMES

The Rise Labs' Specialized trainings are competence-specific, short-focused solution centered classes designed to deliver out of the box knowledge, tools and frameworks to raise the quality of work, value and service delivery of employees and executives to their Employers and to also bring them up to speed with emerging trends required to make them compliant with the future of work.

**PARTICIPANTS GET CERTIFICATION FOR ALL OUR TRAINING PROGRAMS
AND WORKSHOPS ONLY AFTER COMPLETION**

CUSTOMIZED / IN-HOUSE TRAINING PROGRAMMES

Our in-house Trainings are bespoke and specialist, designed for organizations upon their formal request to equip Participants with the capacity to compensate Employers/Organizations with not just the employee's exceptional capabilities but also with the skills required to be effective at work. Organizations seeking to raise the bar in terms of the dynamic core competencies, professional skills and behavioral patterns within their teams and departments with the ultimate goal of transforming and building an agile workforce that epitomize best practices and meets the global standards.

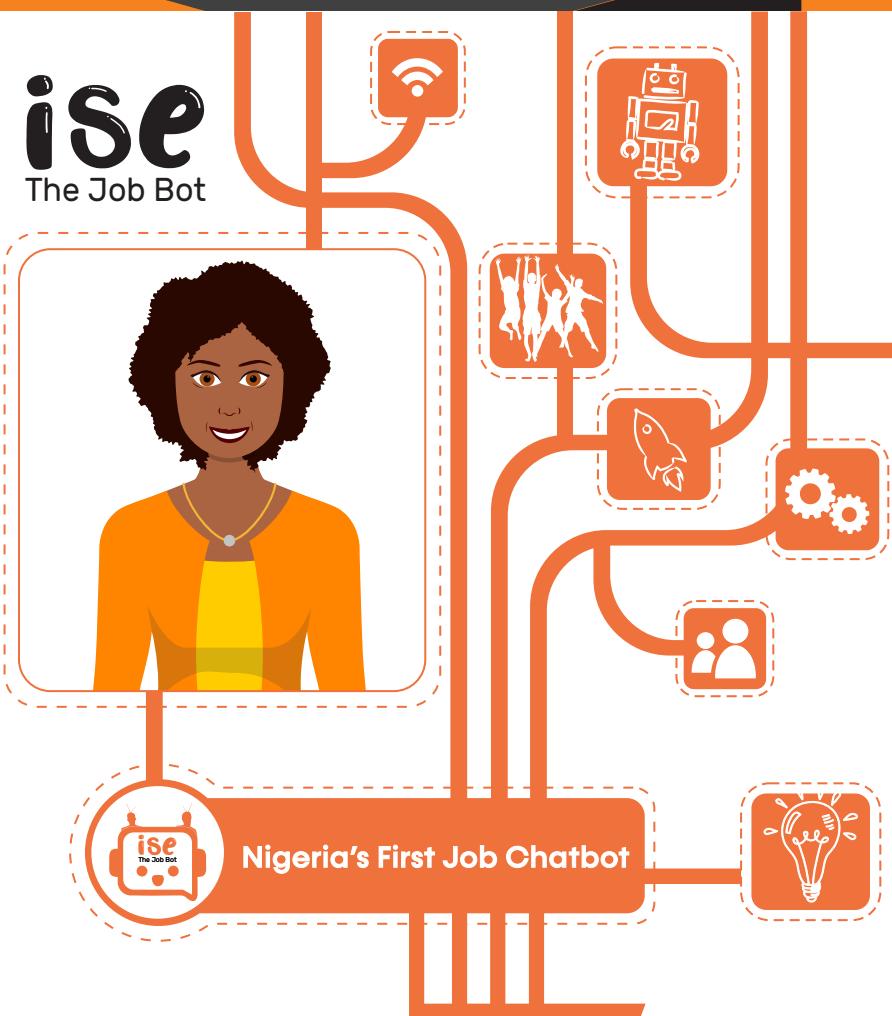

ise

The Job Bot

The Big Data, People Analytics and Artificial Intelligence Component of The Rise Labs is ISE the Job Bot, Nigeria's first Job chatbot which is designed to provide answers to an array of enquiries made from it by Users on various aspects of Career Growth, Job Searches and Work Readiness, 24hrs/7days.

She leverages Machine Learning methodologies and Algorithms from queries received and data fed to it by humans to help them search for Jobs, inform them about new work opportunities and coaches them for interviews. ISE, literally translated as Work in one of the native languages in Nigeria, Yoruba, is your official online HR consultant and Teacher available to anyone, any and everywhere in the world.

Our algorithmic people management frameworks which requires the use of personal data and body language is ground breaking. Imagine a Candidate in our Simulation Lab being interviewed and probed with Cameras and bright lights with the aim of understanding the person's nuances or the presence of tension or fear that may impede the person's success in traditional interviews. We seek to understand those personality challenges because cameras can study and communicate body languages and movements.

We have done an audit of the skills gap and skills mismatch in the Nigerian Economy and we're in the R & D Phase of building algorithms around artificial intelligence related to personality assessments and job profiles. We have a employability index scoring system that rates Individuals based on their performances during our Pre-Interview Coaching and Simulations. There are some social, relational, technical & engagement skills that are critical for different roles and our employability definitions are built and calibrated as a measure of standard.

The Rise Labs is experiential in nature as it embodies a Simulation/Skills Evaluation Studio, an Event Space for periodic meetups, a Meeting Room, a Coffee Shop and a Photography Stand for Professional Headshots.

We are scientifically identifying the gaps in Nigeria's Tertiary Institutions' linear learning because the real business world does not survive on procedural instruction-based learning. Organizations will spend less with us and save time on getting fitting candidates to fill vacancies. Job seekers identify our innovation and artificial intelligence methodology as a clear discrepancy between us and the establishment recruiters. The customization, personalization, atmospheric evaluation tools and skillsets upgrade are provided like a community.

We are a brilliant and dedicated team of young people with curious minds who are leading this revolution in Africa, the world's new frontier/market for Technology with Nigeria leading the way on many levels and we will fully disrupt and transform Africa's Recruitment and Talent Development Space.

We take Data Privacy and Data Protection seriously and only the owner of information provided to us has authority to decide the purpose for which we use the data we collect for.

2019 TRAINING CALENDAR

THE RISE LABS BY RISE NETWORKS

COURSE	SCOPE	PRICE	No. OF DAYS	DATE	DURATION
Data Literacy for Decision Making in Organizations: Lessons in Data Analysis, Visualization and Management	A deep dive into Analytics and Big Data for individuals and organizations who have so much data and information at their disposal but do not know how to crunch the numbers and leverage them for the growth of their Enterprise or those of their Clients is the true focus of this Subject Matter. At the end of the course, you will understand how to explain huge numbers, crunch them in simple pictorial frameworks or infographics and use it to guide your organization on decisions and projects for different sectors.	N 10,000	1 Day	Thursday 30th May	10am–5pm
